

### **General Comments from Respondents**

No problems and we are blessed to have her  
We love our frenchie  
4/4 frenchies tested carry the gene for DM. More should be tested  
Extremely healthy  
Dog mostly deaf with one deaf offspring  
One shallow hip socket and noisy breather  
More specialized tests needed including spine x-rays  
Sudden onset blindness due to GME  
We love her but a lot of puppy mill breeders  
Rescue with patella surgery, bowed legs and spine problems  
Nare surgery  
Stolen from my back yard  
Purchased from a pet store  
White dog with fawn line on back  
Submissions to OFA not necessary  
Switching to a raw diet  
We need licensed breeders in the US interested in health problems  
Male line dying at an early age from cancer  
Very allergic to fleas  
Rabbit and potato diet cured her food allergies  
I am so lucky to have such a healthy fellow  
Unprovoked bite incidents, returned to breeder and put down, broke my heart  
Lived a wonderful, short life  
Love my frenchie  
If breeders would take responsibility we could remove 90% of problems  
Would like a question on deafness and coat color  
Glad the club is doing this  
Thank you for doing this  
Coat color/temperament - a controversial question  
Want a survey with option to attach dog's name and pedigree  
Wonderfully bred bitch and we are thankful to the breeders  
We need to watch temperaments  
Keep up the good work  
Received chemotherapy for mast cell disease  
Chews miniature Christmas lights  
Remarkably healthy, loves everyone and plays with our puppy  
He hates cold weather  
Littermates died of brain cancer  
I love frenchies  
The breed has many health, temperament and conformation problems, it is a shame  
Too many dogs being bred that shouldn't be  
All three frenchies healthy  
Cream male puppy healthy  
Brindle bitch healthy  
Brindle puppy healthy

Died from aspiration pneumonia  
Spine was a train wreck  
I am privileged to have my first frenchie and be a part of the frenchie world  
Honey pied bitch very healthy  
Small litters  
Exceptionally healthy cream dog  
No malformations but a disc herniated  
Spinal research is so important  
I have lost 14 to 15 dogs to cancer over 20 years  
Signs of DM at 10, still here at 14  
Nares operated on  
Breeders deny that frenchies have allergies  
Lower eyelid weakness lead to corneal ulcer  
Frenchies being bred too close genetically  
Generally healthy but did have nares operated on  
Red coat  
One male with extreme IBC  
Would throw up, block airway and faint  
Frequent anal gland impactions  
Mother of cryptorchid  
Very ugly spine with a dip but no symptoms  
Four hemis in a row thoracic but no symptoms  
We need to take cobby out of the French bulldog description, proportioned will do  
-Ear, eye, vulva, anal, back, leg and nipple mast cell tumors  
Tumor next to a canine  
Treated for brain cancer. Many side effects. Healthy otherwise.  
Opposite effects of drugs, made her hyper, not drowsy
